Selected Projects

Bend In Spoon 🌐 [Live Demo](#) | [Github](#)

- Built a forecasting dashboard for restaurants using real-time data, such as rental occupancy, events, weather, and sales/labor.
- Implemented client specifications into accessible, scalable code.

Terra Bean Coffee Co. 🌐 [Live Demo](#) | [Github](#)

- E-commerce demo with inventory management, shopping cart, and scroll-based UI animation.
- Designed full brand identity and responsive layout in Figma; developed custom components from concept to code.

Experience

UI Developer & Graphic Designer | Freelance | Aug 2017 - present

- Developed responsive, standards-compliant websites using HTML, CSS, JavaScript, and React.
- Implemented client specifications into accessible, scalable code.
- Created brand identities based on client input, including logos, design systems, and digital style guides.
- Delivered end-to-end web solutions for small businesses, including e-commerce setups, content updates, and CMS integrations.

Full Stack Developer, Internship | SimBco | May 2023 - July 2023

- Built responsive internal web tools using React.js, Node.js (Feathers.js), Tailwind, and Ionic.
- Connected RESTful APIs to AWS data using Sequelize.
- Created automation scripts and email triggers via Sequelize hooks.
- Used Docker for local development and containerized deployments.
- Participated in team code reviews and Agile development sprints.

Full Stack Developer | Epicodus Projects | Jan 2023 - July 2023

- Coded full-stack applications in JavaScript, CSS3, HTML5, React, and C#.
- Collaborated in pair programming to build responsive, accessible apps.
- Used ESLint and Jest for testing, managed version control with Git.

Founder | ok Louise | Aug 2018 - July 2021

- Launched a startup leather bag and accessory company.
- Managed product lifecycle from CAD design to final production.
- Engineered patterns to maximize yield and reduce waste by 20%.
- Connected consumers to the brand through website, social media, trade shows, and local boutiques.
