Associate degree, General Studies
University of Oregon

Web Developer with a strong foundation in HTML, CSS, and JavaScript, plus knowledge of UX/UI design and background in product design. Experienced in building responsive, accessible websites and applications using modern frameworks React and Tailwind. Passionate about translating designs into clean, scalable, user-centered code. Collaborative, organized, and eager to contribute to client-focused development in a fast-paced team.

Selected Projects

Bend In Spoon  [Live Demo](#) | [Github](#)

- Forecasting dashboard for restaurants using real-time API data, including rental occupancy, events, and weather trends.
- Implemented client specifications into accessible, scalable code.

Terra Bean Coffee Co.  [Live Demo](#) | [Github](#)

- E-commerce demo with inventory management, shopping cart, and scroll-based UI animation.
- Designed full brand identity and responsive layout in Figma; developed custom components from concept to code.

Experience

UI Developer & Graphic Designer | Freelance | Aug 2023 - present

- Developed responsive, standards-compliant websites using HTML, CSS, JavaScript, and React.
- Implemented client specifications into accessible, scalable code.
- Created brand identities based on client input, including logos, design systems, and digital style guides.
- Delivered end-to-end web solutions for small businesses, including e-commerce setups, content updates, and CMS integrations.

Full Stack Developer, Internship | SimBco | May 2023 - July 2023

- Built responsive interfaces for web using React.js, Tailwind, and Ionic.
- Integrated back-end APIs and services using Feathers and Sequelize.
- Wrote hooks using Sequelize to fetch AWS data and automate email formatting in the backend API.
- Participated in team code reviews and sprint-based development cycles.

Full Stack Developer | Epicodus Projects | Jan 2023 - July 2023

- Coded full-stack applications in JavaScript, CSS3, HTML5, React, and C#.
- Collaborated in pair programming to build responsive, accessible apps.
- Used ESLint and Jest for testing workflows, managed version control with Git.

Founder | ok Louise | Aug 2018 - July 2021

- Launched a startup leather bag and accessory company.
- Managed product lifecycle from CAD design to final production.
- Engineered patterns to maximize yield and reduce waste by 20%.
- Connected consumers to the brand through website, social media, trade shows, and local boutiques.
